

ULTIMA

LED BEAUTY MASK

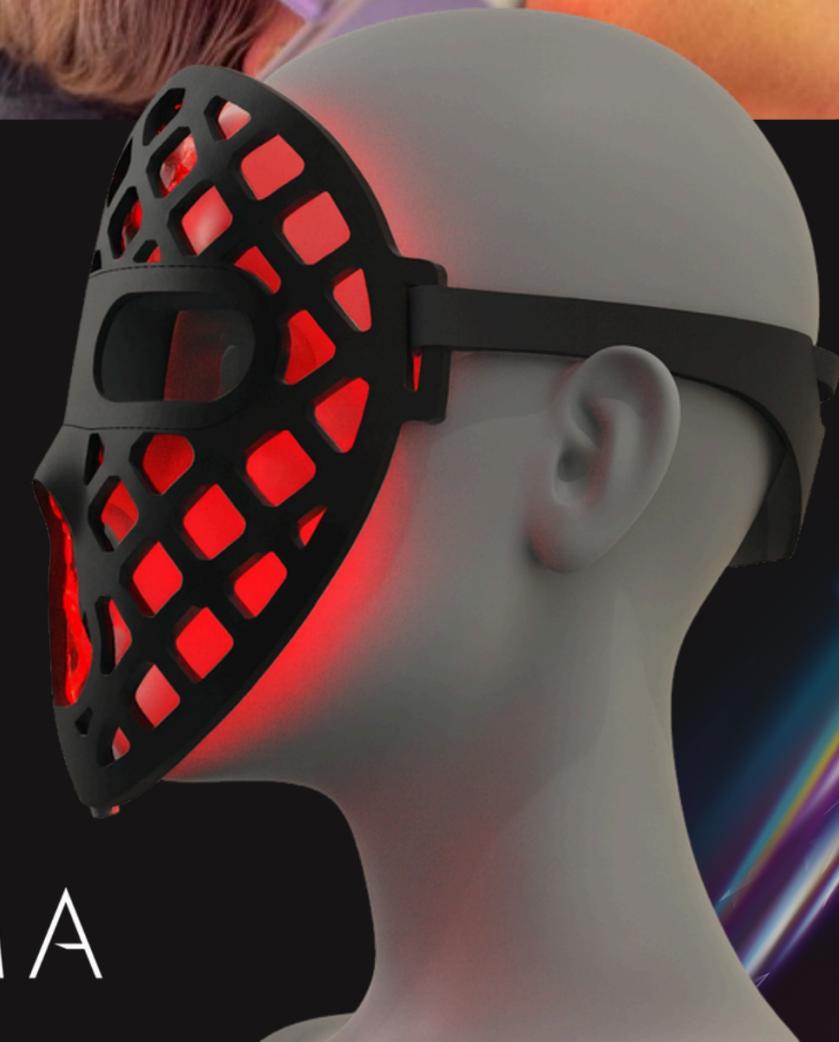

ULTIMA LED Beauty Mask

- Premium, patented multi-wavelength LED mask
- Ideal add-on for aesthetic clinics, beauty studios and wellness businesses
- High-demand, high-margin retail product

WHY THE LED MASK IS ESSENTIAL FOR ULTIMA AFTERCARE?

- Extends, maintains and enhances Ultima Face treatment results
- Daily LED use keeps collagen activation switched on between sessions
- Strengthens aftercare process → higher client satisfaction
- Improves treatment longevity and boosts retention

ULTIMA

KEY SELLING POINTS

- **Ultra-light 93 g design** – one of the lightest LED masks on the market
- **Flexible, soft food-grade silicone** – premium, skin-safe, comfortable
- **Patented 3D floating structure** – enhanced light uniformity
- **Breathable honeycomb design** – prevents heat buildup
- **True eye-protection system** – safe for reading, TV, laptop use
- **IP67 water & dust resistant** – hygienic, long-lasting, easy to clean
- **Precision-screened LEDs** – accurate, stable wavelength output
- **Slim, travel-friendly** – fits into handbag, perfect for on-the-go clients

SAFE EYE PROTECTION – A MAJOR DIFFERENTIATOR

- Built-in eye-shield allows safe reading, TV watching, laptop work during treatment
- Most competitor masks lack true eye protection - unsafe for screen viewing
- Clients value treatments they can integrate into their routine
- Encourages frequent use - better results and higher perceived value

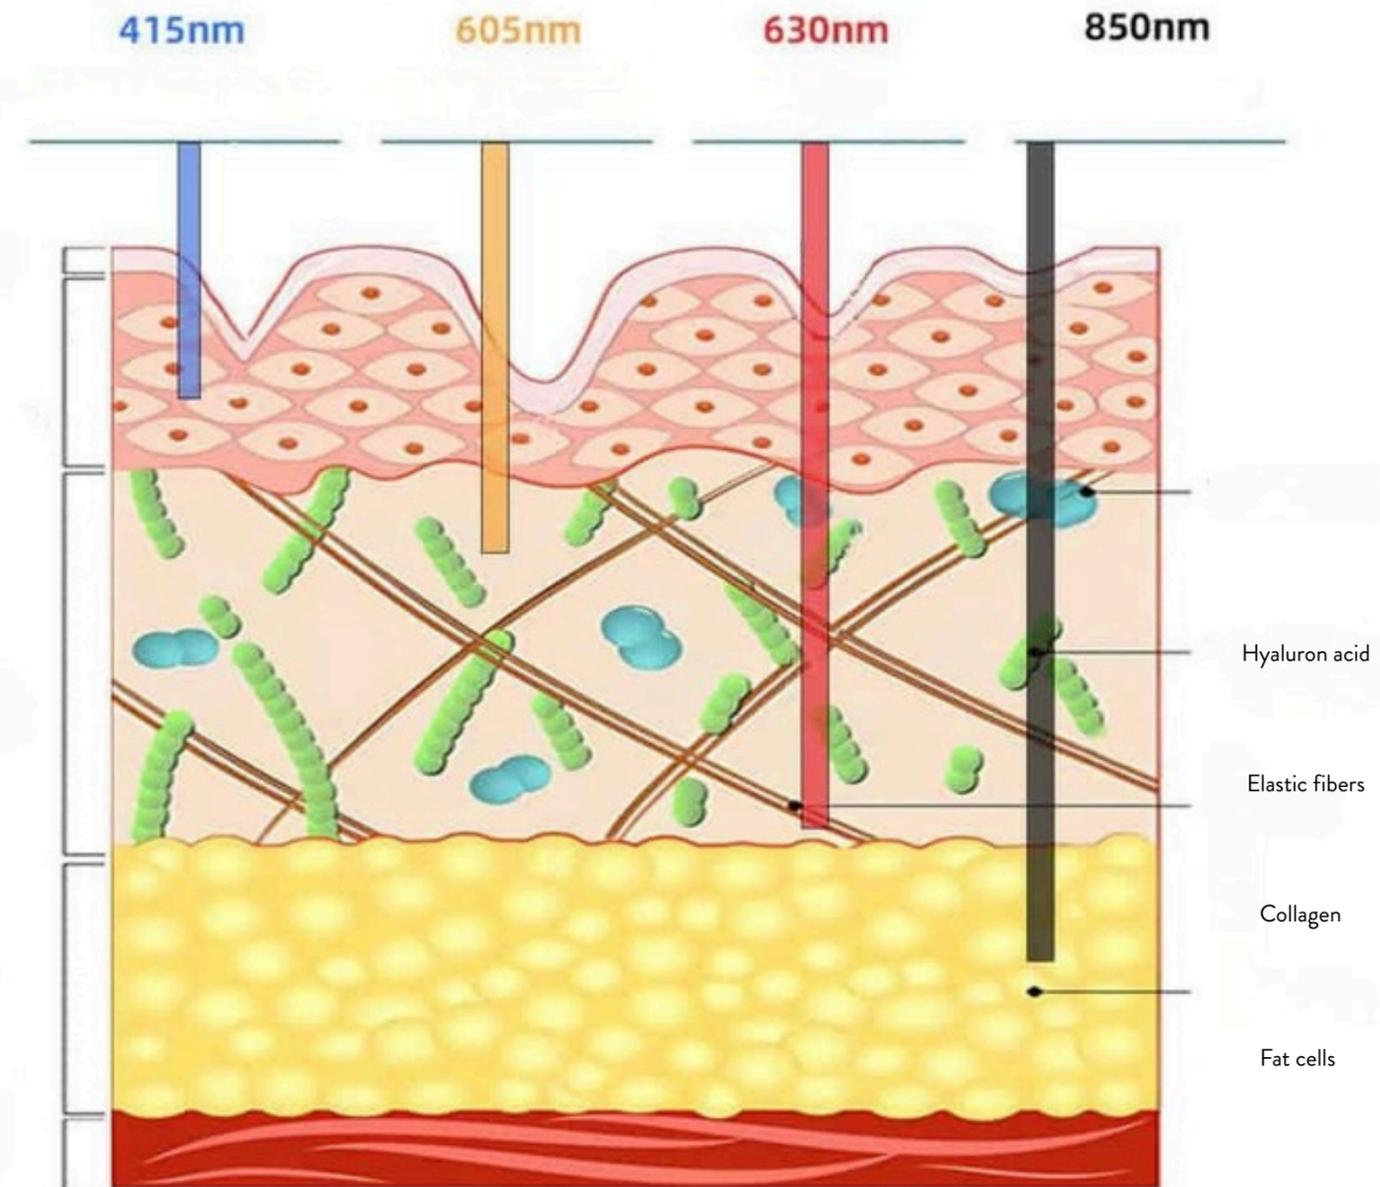

ULTRA-LIGHTWEIGHT, FLEXIBLE & TRAVEL-FRIENDLY

- Only 93 g – one of the lightest LED masks on the market
- Flexible and slim: fits easily into a handbag or travel case
- Perfect for vacations, business trips, commuting or mid-day quick recharge
- Competitors: typically rigid, bulky and inconvenient to carry

4 THERAPEUTIC WAVELENGTHS

- **Near-Infrared (850 nm):** deep cellular renewal
- **Red (630 nm):** collagen + elasticity boost
- **Yellow (590 nm):** reduces redness & brightens
- **Blue (415 nm):** supports clearer-looking skin

PERFECT ADD-ON TO ULTIMA FACE TREATMENTS

- Completes the professional-to-home treatment journey
- Boosts longevity and effectiveness of in-clinic results
- Clients love structured aftercare - improves loyalty
- Provides clinics an easy, profitable upsell opportunity

WHY IT'S BETTER THAN

VS

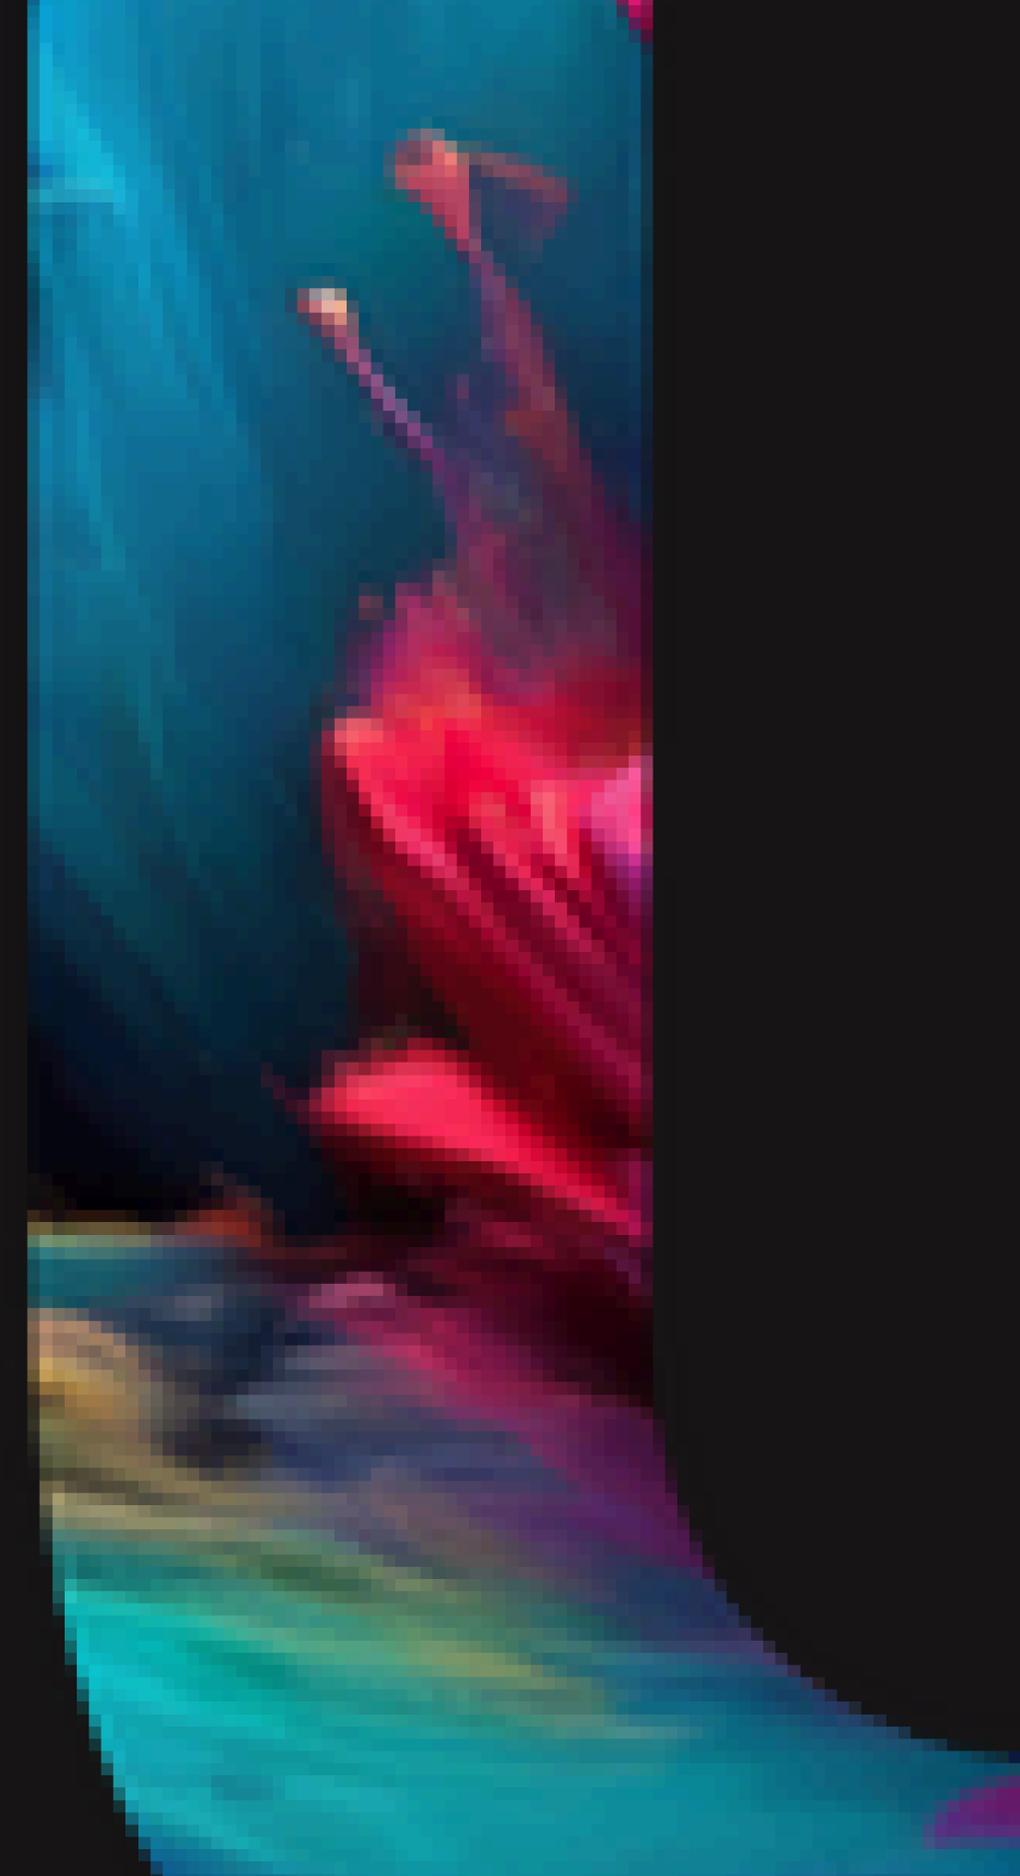

OTHER MASKS?

- Flexible 93 g mask you can wear anytime,
- Breathable honeycomb comfort
- Precision-screened LEDs + patented design
- Built in eye protection → safe for reading, watching TV, or working during treatment

- Rigid, heavy, uncomfortable
- Closed, hot and sweaty
- Basic LEDs
- Lack proper eye shielding → cannot safely look at screens; higher light exposure risk

PRICE COMPARISON – PREMIUM LED MASKS (EUROPEAN RRP)

- Omnilux Contour Face ~450 €
- Dr. Dennis Gross SpectraLite Pro ~455 €
- HigherDose Red Light Mask ~347 €
- Qure Q-Rejuvalight Pro ~347 €
- Silk'n LED Mask ~341 €
- ULTIMA LED Beauty Mask 350 € (Better design, safety & portability)
